

Work and Simple Machine Rap

By Mr. Warren

Verse 1

Doh ooh ah ah aye aye turn up , this science class so hot in here the fireman think its gonna burn up

(Hmmm)

Simple machines make work easy, it's too easy, like lemon squeezes; if you don't believe me pick up a book and then work

We grind hard but don't break a sweat, we learn like we got no regrets, 5 Period, we up Next. (Hmmm)

Lever, pulley, wheel and axle, they so special (woo)

Incline plane, that wedge and screw make work less hassle (woo)

Force and distance multiply it, get your answer (woo)

Input / output I can tell you how to check it, (woo)

Rube Goldberg swag I'm just simple tasking...

Chorus / Hook

Work , Work, Work, Work , Work ,Work , Turn Up x4

Disclosure

Please note that this song is not grammatically correct. It is written to help students understand the concept of work and simple machines listed below

Work- The amount of force multiplied by distance. It is the amount energy required to move an object.

Simple Machines- Are designed to may work easier by reducing the amount of effort required.

Types of Simple Machines - There are 6 basic simple machines; the lever, the wheel and axle, the inclined plane, the wedge, the pulley, and the screw.
